

From personal productivity to AI-powered teams and business value

Copenhagen Airports' hands-on AI training for leaders – four modules covering AI in your role, your role in adoption, AI in your domain, and from potential to value.

1

AI in your role

- Introduction
- AI at CPH: tools, opportunities and guardrails
- Leading in the Age of AI
- Copilot, prompting and best practices for leaders: Meeting preparation, communication and decision support

2

Your role in adoption

- The leader's role in AI adoption
- AI in 1:1s, knowledge sharing and leadership communication
- Quality, accountability and “AI-slop”
- Copilot end-to-end: Real life leadership case

3

AI in your domain

- Assistants, agents and pre-built agents
- How to identify valuable use cases (Use case agent)
- What do you need? Data, processes and success criteria
- Not to forget: Governance, security and compliance
- Time to build: Agents

4

From Potential to Value

- Mapping AI-enabled workflows
- Prioritising use cases based on value and feasibility
- Setting goals and measuring value
- Time to build: Solutions with AI
- Success with AI: How we collaborate in CPH
